

## Case Study:

3-D Product  
Development

Let us help you optimize your production workflow with our 3-D capabilities. Saving on sampling costs and material waste, our 3-D garments enable design modifications prior to production. Our teams can create realistic 3-D renderings bringing your product to life in the most convincing manner, de-risking design choices and reducing rounds of sampling cost.

 browzwear

Our software allows for analysis of each pattern piece, enabling us to rework fit according to the stress and tension maps, simulating a live fitting.

Explore print and pattern, all over or placed artwork with ease while swiftly adjusting scale and color. Take low risk chances to find a combination that pushes the edge of your design.

Make pattern adjustments with ease. See the effect of fit edits to your style in real time. The design possibilities are endless.
